

## **R&D project with SensAbues' BreathTrap.**

SensAbues offers you a free of charge, small quantity of "BreathTrap" sampling units.

We appreciate if you could send us information about you and your project before we send you free of charge sampling units. You do not need to reveal any confidential information, but we are more than willing to sign a mutual Non Disclosure Agreement if needed.

Please fill in the answers to the questions below. This information will be kept strictly confidential between you and SensAbues AB.

N.B. The analysis of abused drugs in breath samples requires a high sensitivity LC-MS/MS (SRM mode) instrument with capability to detect sub-pg levels applied on column.

1. Your full shipping address.

Company/ University

Delivery address

Zip code

Town

State

Country

2. Who is project leader.
3. When will this project start and when is it planned to be finished?
4. Is your target to trap aerosols? What is the next step in the analyzing process.
5. How many BreathTrap sampling units do you need for now?

If you need more than 20pcs we offer you a special price. Please let us know.

6. Do you plan to publish results? Domestic or Internationally?

Best Regards  
Bo Hammarlund, CEO.
